Creating Dashboard 1 — Visualization Tool for Electric Vehicle Charge and Range Analysis

Step 1: Create a New Dashboard
a) At the bottom of Tableau, click the New Dashboard button (the icon next to the sheet tabs).
b) A blank dashboard canvas will open.
c) The dashboard will be named Dashboard 1 by default.

Step 2: Set the Dashboard Size
a) On the left panel under Size, click the dropdown.
Select Fixed Size → choose Desktop Browser (1000 x 800) or select Automatic for responsive layout.

Step 3: Add Sheet 1
a) From the left Sheets panel, drag Sheet 1 into the centre canvas.
b) Drop it in the top-left area of the dashboard.
c) On the right side of the sheet a downward arrow appears — click it and select Floating option if you want free positioning, or leave as Tiled for auto layout.
d) Resize the sheet by dragging its edges to fit the top-left quadrant.

Step 4: Add Sheet 2 —
a) From the left Sheets panel, drag Sheet 2 into the canvas.
b) Drop it in the top-right area of the dashboard.
c) Resize to fill the top-right quadrant.

Step 5: Add Sheet 3 —
a) From the left Sheets panel, drag Sheet 3 into the canvas.
b) Drop it in the bottom-left area of the dashboard.
c) Resize to fill the bottom-left quadrant.

Step 6: Publish the Dashboard to Tableau Public
a) Click File from the top menu → select Save to Tableau Public.
b) Sign in with your Tableau Public credentials if prompted.
c) Name the workbook — ev analysis keep existing name.
d) Click Save — Tableau will upload and open the live link in your browser.
Your Dashboard now live at: ev analysis | Tableau Public

1) Storyboard

A storyboard is a visual representation of a sequence of events, typically used in multimedia projects such as films, animations, advertisements, or presentations. It consists of a series of drawings or images arranged in a sequence, often accompanied by annotations or descriptions, to outline the flow of the story or concept.

Step 1: Create New Story
a) At the bottom of Tableau, click the New Story button next to the sheet tabs.
b) A blank story canvas will open named Story 1.

Step 2: Set Size
a) On the left panel under Size → select Automatic or Desktop Browser (1016 x 964).

Step 3: Add 10 Story Points
a) Click Blank on the left panel to create each new story point.
b) Drag and drop each sheet from the left Sheets panel onto the canvas one by one.
c) After dropping each sheet, click Add a Caption at the top and type the caption name.

Step 4: Add Story Title
a) Check Show Title at the bottom-left panel.
b) Double-click the title and type — Story of Electric Cars In India

Step 5: Publish
a) Click File → Save to Tableau Public.
b) Sign in → Name the workbook → Click Save.
c) Story goes live on your Tableau Public profile.
